

## **Subject: Strange tribal trick heals fatty liver FAST**

Hi,

If you suffer from fatty liver, then one of the most frustrating things would be losing weight.

You might find it to be extremely hard for you...even when you eat reasonably well.

You might be feeling tired most of the day even when you get enough sleep.

Do you find it hard to focus?

Does depression creep into your life even when things are going pretty good?

The good news is...

One of my closest friends, **Earl McKinney** has just discovered this [strange tribal trick](#) from the Himalayan mountains that can heal fatty liver extremely fast!

Once I tried this myself, I had to share it with you...
